SUBJECT: Enclosure 11 (Reserve Component Integration) to V Corps Command Training Guidance for FY05-06

1. **Purpose.** To provide V Corps's Reserve Component Division's Input to the FY 05/06 CTG.

2. **References.**

- a. AR 11-30, The Army WARTRACE Program.
- b. AR 350-9, Overseas Deployment Training.
- c. FORSCOM Reg 11-30, The Army WARTRACE Program.
- d. FORSCOM Reg 220-3, Reserve Component Training Assessment.
- e. FORSCOM Reg 350-2, Reserve Component Training in America's Army.
- f. FORSCOM Reg 350-4, Active Component (AC)/Reserve Component (RC) Training Association Program.

3. **Background:** RC units are affiliated with V Corps under the following programs that create training and wartime relationships. These affiliations are used to build the appropriate troop lists for Corps and Division level exercises.

a. **Corps Packaging.** The 35<sup>th</sup> Infantry Division, 256<sup>th</sup> Separate Infantry Brigade and the 278<sup>th</sup> Armored Cavalry Regiment are Corps Packaged with V Corps. Corps Packaging aligns ARNG divisions and enhanced Separate Brigades (eSBs) with active-duty Army corps, facilitating AC/RC integration, exercises, training associations, and sourcing of contingency operations. Corps Packaging does not provide any additional resources for the participants. Corps packaging does not connote OPLAN alignment or WARTRACE. (Joint Strategic Capabilities Plan apportionment is being worked as a separate action.) Units Corps Packaged with V Corps continue to have peer and senior mentor relationship with III Corps units as part of FORSCOM's role in providing guidance and oversight of RC units inside CONUS.

b. **Wartrace.** The WARTRACE program was initiated in 1994 as a replacement for the CAPSTONE Program. WARTRACE is a planning tool for wartime contingencies and creates a defined training association and focus between specific RC units and V Corps. WARTRACE affiliations are associated with OPLANs for various contingencies. Units which are traced to V Corps on multiple OPLANs or who's primary WARTRACE is to V Corps are prime candidates for inclusion in Corps and Division Exercises. WARTRACE alignments are classified and can be accessed utilizing JOPES.

c. **7<sup>th</sup> ARCOM Alignment.** The 280<sup>th</sup> Rear Operations Center (ROC), 301<sup>st</sup> ROC (1 ID), 1AD ROC, 309<sup>th</sup>, 317<sup>th</sup>, and 345 Rear Area Operations Centers (RAOCs), 1172<sup>nd</sup>

Movement Control Team, 454<sup>th</sup> Replacement Detachment, 7<sup>th</sup> JTF Augmentation Team, 10 Logistics Augmentation Team and the II<sup>nd</sup> (GE) Korps LNO Reserve Support Augmentation Element (RSAE) are Germany-based USAR units with missions to support V Corps. These units are the sole providers of specific command and control support to Corps and Division Rear Areas.

(1) Reserve Component units support the Corps in various ways. In one example, reserve component soldiers are 65% of the Corps Rear Command Post. The 280<sup>th</sup> ROC's Mission Statement is: Upon mobilization, 280<sup>th</sup> ROC forms the nucleus of the Operations Cell, V Corps Rear Command Post, providing command and control of rear operations in the Corps Area of Responsibility.

(2) **Reserve Component affiliation.** The Corps maintains situational awareness of all RAOC/ROC unit stationing concerns and desires. Additionally, the Corps lays out the affiliations of all RAOCs and ROCs with active components units.

(a) 280<sup>th</sup> ROC.....affiliation.....V Corps

(1) 317<sup>th</sup> RAOC.....affiliation.....V Corps

(2) 309<sup>th</sup> RAOC.....affiliation.....V Corps

(3) 345<sup>th</sup> RAOC.....affiliation.....V Corps

(b) 1AD ROC.....affiliation.....1<sup>st</sup> Armored Division

(c) 301<sup>st</sup> ROC.....affiliation.....1<sup>st</sup> Infantry Division

(3) **Habitual Training Relationships/ODT Program.** There are units who are not currently on a WARTRACE or other type alignment to V Corps but who satisfy their unit METL by training with V Corps through the Overseas Deployment Training (ODT) program, whereby they support V Corps exercises and provide significant operational support. The annual participation of the 109<sup>th</sup> EN Group in WFX's and the Corps EN BDE BRIDGEX is one such example. Operational rotations of National Guard maneuver units to support CMTC OPFOR requirements and Aviation Maintenance units to support the COSCOMS 7-159 AVN are examples of RC units accomplishing both training and mission support during one deployment.

The following training relationships have been established via the ODT program:

(a) Field Artillery (ARNG).

➤ 45<sup>th</sup> FA BDE (OK): 1-158 FA (MLRS), 1-171 FA (MLRS), 1-86 FA (155 SP)
